

**A NEW TREATMENT IS NOW
AVAILABLE FOR CATS SUFFERING
FROM CHRONIC KIDNEY DISEASE
AND ANEMIA**

Currently, anemia affects 30 to 60% of cats
with renal failure!

NEW TREATMENT :

- ✓ proposed to **treat anemia in cats with renal failure** in the framework of an international clinical study
- ✓ Aims to increase the red blood cells production (lacking in case of anemia) and **improve cats quality of life**
- ✓ Applied **at home**, once / day
- ✓ **Easy to administrate**
- ✓ Good tolerance observed in previous study on cats with renal failure
- ✓ Currently, in final clinical phase in humans for the same therapeutic indication

FOLLOW-UP :

Your cat will be closely monitored during regular visits at **your veterinary clinic** :

- ✓ First month: 1 visit / week
- ✓ For next 5 months : 1 visit every 2 weeks

FINANCIAL COVERAGE:

- ✓ **Full financial coverage** of the treatment and all consultations with clinical & biological exams planned within the protocol
- ✓ **Additional compensation** : discount up to 100€ for feline diet or concomitant treatments taken during the participation to the protocol

**DO YOU THINK THAT YOUR CAT COULD BENEFIT
FROM THIS TREATMENT?**
